Cine-G

This unit is the end result of years of meticulous design and rigorous flight testing. The highest level of creative latitude and versatility has been engineered into this awesome closed architecture gimbal. The Cine-G's entire camera and lens package are stabilized as a single unit. The Cine-G is the newest system with our unique inner gimbal design and steerable horizon, providing roll capability + or - 88 degrees. It's completely stable, even at the long end of the 22X lens on the Sony F-23 camera.

Specification for the Cine-G:

- Pan Rotation: 360 Degrees Continuous
- Tilt Rotation: +45/-75 Degrees From Horizontal (Adjustable To -125)
- Steerable Roll Rotation: +/- 88 Degrees From Horizontal
- Gimbal Rates: Up To 90 Degrees Per Second
- Stabilization: Better Than 5 Microradians — Line of Sight
- Power Requirements: 20 To 32 VDC, 3 Amps Standby, 15 Amps Max Active
- Gimbal Weight: 99 Pounds
- All Up Weight: 126 Pounds
- Off-Gimbal Electronics Case: 17.4 x 6.5 x 7.7 Inches
- Lap Top Control Desk: 16 x 10 x 2.5 Inches

- 5-Axis Gyro-Stabilization: Eliminates Pan, Tilt And Roll Jitter To The Camera
- Maintains Internally Stabilized Pointing Direction Independent Of Vehicle Maneuvers
- Fully And Easily Steerable In All Three Axes: Pan, Tilt And Roll
- The ONLY Gimbal With Stabilized Steerable Roll Control
- Remote Controlled Motorized 2x Extender On Lens
- Gimbal System Electronics Are Placed In The Cockpit, Or Luggage Compartment.
- User Friendly Control Desk Ergonomically Designed For Ease Of Operation System
- Uses State-Of-The-Art Sensing Technology

Sony F23

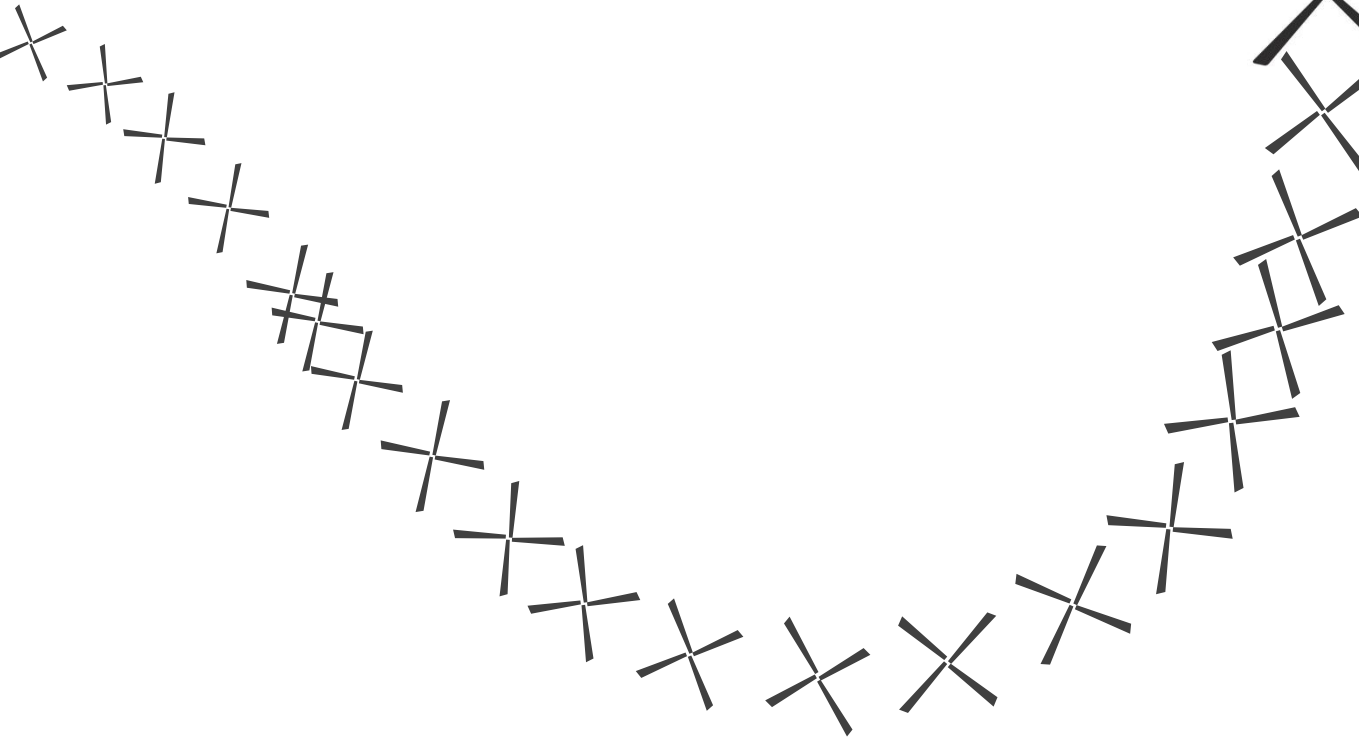

The F23 incorporates several new features as a direct result of feedback from production professionals.

Full 4:4:4 1920 x 1080 RGB acquisition

Three 2.2 megabit 2/3-inch type progressive CCD imagers and a 14-bit A/D converter supporting 1080/23.98P, 24P, 25P, 29.97P, 50P, 59.94P, 50i and 59.94i formats.
